

ReactJS Test for MessageMedia (in partnership with Pyco Group)

- Set up a simple React JS application
- Put in public or private repository (up to you)

If private please add Si1klfY (GitHub)

- callum-mm (Bitbucket)
- jdinhlife (GitHub)
- jackdinh (Bitbucket)

Or send through as a zip file (including git folder)

-not recommended as email clients like to strip things

Pull from the Giphy trending endpoint

- GET <https://api.giphy.com/v1/gifs/trending>
- Setup account - GIPHY for Developers | API [Documentation](https://developers.giphy.com/docs/)

Design should look like image attached below:

- Adapts to browser width
- Images in grid
 - Desktop row of 4 images
 - Tablet row of 3 images
 - Mobile row of 2 images
- When user clicks or taps on image, show image full screen
- Only load maximum 20 images at a time
 - Will need a way for users to load 20
- When you click an image it should show full screen
